DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 7, the recitation "that substantially deviates from a right angle" makes the claim scope indefinite because the metes and bounds of such recitation cannot be clearly determined with respect to "an acute angle" as claimed. In other words, at what angle would it not substantially deviate from a right angle? Applicant is respectfully requested to clarify the specification on this matter where necessary.

Claims 5, 6 and 7, "the common pivoting plane" lacks proper antecedent basis.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Erken '562.

The patent to Erken '562 clearly discloses all of the recited subject matter as shown by Erken's Figs.3 and 4 (see also col.3, lines 11-14).

With respect to claims 5 and 7, it will be added that the phrases "relatively close" and "relatively far" are merely relative in nature. Further, with respect to claims 6 and 7, the "pulling direction" merely depends on which direction a user decides to "pull" the device thus determining which side would be the "upstream" or "downstream" end. Clearly, Erken's Fig.4 shows a "common pivoting plane" with a geometric line of intersection.
